Hi Erin:

Yes. We should be able to get this updated and turned around by next Friday, Jan. 13. Is an attachment missing? I only saw the FFS report with your embedded comments. I didn't see any comments from anyone else in the document or elsewhere.

Thanks,

Mike

Mike, attached are the comments on the FFS for the building demolition. My comments that we already discussed are also included in this. We need to get the revised document back to us asap. I believe you scheduled a week in the original time table once you got the comments back, so is next Friday feasible?

Also, I left you a message. I'm not sure that the cap described is necessary. The soil at the site is contaminated with the same chemicals and there is only an asphalt cap on it (unless I am wrong). Why do we need this thick of a cap? Is this regulated? Standard practice? Please provide more information. We may want to decrease this if it is not required.

Please let me know if you have any questions. Thanks!

Erin McCoy

Erin:

Please find attached the Draft Focused Feasibility Study for the Building Demolition at Des Moines TCE. Feel free to contact me, if you have any questions.

Best,

Mike
